SUMMARY

Computer Engineering undergraduate with hands-on experience developing business-oriented web applications and workflow management systems through software engineering internships. Skilled in requirements analysis, workflow design, full-stack web development, deployment, and user testing using Django, PostgreSQL, and JavaScript-based technologies.

EDUCATION

Thammasat University (Rangsit Campus)

Expected Graduation: July 2026

- Bachelor of Engineering Program (Computer Engineering)
- GPAX: 3.17
- Relevant Coursework: Object-Oriented Programming, Software Engineering, Object-Oriented Analysis and Design, Database Systems, Web Application Development, Data Center Management, Cloud Computing
- Scholarships: Mitsubishi Electric Thai Foundation Scholarship

WORK EXPERIENCE

World Product Development (Intern – Full Stack Developer), *Smart Service and Management Co., Ltd.* August 2025 – November 2025

- Collaborated with stakeholders to gather business requirements and design workflow-driven solutions supporting 6 user roles and end-to-end service request workflows.
- Developed a workflow-driven service request management web application using Django and PostgreSQL, implementing ticket workflows, dashboards, reporting, and automated notification services.
- Deployed the prototype via Cloudflare, conducted pilot-user testing, and incorporated user feedback that laid the foundation for the company's continued development and my university senior project.

Teaching Assistant (Python Programming), *Thammasat School of Engineering*

July 2025

- Assisted in teaching Python programming laboratories for 25+ undergraduate students by explaining core programming concepts, answering technical questions, and providing one-on-one debugging guidance.
- Assessed programming assignments and quizzes, provided constructive feedback, and supported examination supervision to ensure consistency and fairness in course evaluation.
- Mentored students in Python programming, debugging, and problem-solving techniques, helping them strengthen coding fundamentals and successfully complete laboratory exercises.

Programmer (Intern – Full Stack Developer), *Somsri Garment Co., Ltd.*

June 2024 – July 2024

- Developed and maintained internal business web applications using Vue.js, Nuxt.js, Node.js, Prisma, and Tailwind CSS by implementing new features, resolving bugs, and improving operational workflows.
- Automated document generation by replacing manual paper-based forms with PDF generation (pdfMake), reducing manual paperwork and improving document preparation efficiency. Integrated LINE Official Account (LINE OA) to improve customer communication and notification processes.
- Collaborated with senior developers to design, test, and deliver production-ready features using REST APIs, Postman, GitHub, and Agile development practices.

PROJECTS

Real-Time Project Request and Progress Management System (University Senior Project)

August 2025 – April 2026

Tech Stack: Django, Python, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, LINE Messaging API

- Expanded the internship prototype into a production-oriented workflow management platform through a 9-month software engineering project.
- Designed and implemented a workflow management platform featuring RBAC, SLA monitoring, duplicate request detection, multi-level approvals, analytics dashboards, and automated LINE OA/Email notifications.
- Refined the system through Functional Testing, Integration Testing, User Acceptance Testing (UAT), and iterative improvements based on pilot-user feedback.

TECHNICAL SKILLS

- Languages: Python, JavaScript, TypeScript, SQL, Java
- Frameworks: Django, Vue.js, Nuxt.js, Bootstrap, Tailwind CSS
- Database: PostgreSQL
- Tools: GitHub, Postman, Docker, Figma, VS Code, Microsoft Office, Canva, CapCut
