SUMMARY

Computer Engineering undergraduate with hands-on experience in full-stack web application development through two software engineering internships. Skilled in developing business-oriented applications using Django, PostgreSQL, JavaScript, and Vue.js, with experience spanning requirements analysis, workflow design, implementation, deployment, and user testing. Seeking a Software Engineer or Full Stack Developer position to contribute strong software engineering and problem-solving skills.

EDUCATION

Thammasat University (Rangsit Campus)

Expected Graduation: July 2026

- Bachelor of Engineering Program (Computer Engineering)
- GPAX: 3.17
- Relevant Coursework: Object-Oriented Programming, Software Engineering, Object-Oriented Analysis and Design, Database Systems, Web Application Development, Data Center Management, Cloud Computing
- Scholarships: Mitsubishi Electric Thai Foundation Scholarship

WORK EXPERIENCE

World Product Development, *Smart Service and Management Co., Ltd.*

August 2025 – November 2025

- Developed a role-based complaint management web application for residential communities using **Django, PostgreSQL, HTML, CSS, JavaScript, and Bootstrap**, collaborating with stakeholders to gather requirements and design system workflows.
- Designed and implemented full-stack features including request workflows, dashboards, reporting, **PDF/Excel export**, and **Email/LINE Official Account** notifications to support issue tracking and resolution processes.
- Supported prototype deployment through **Cloudflare**, participated in pilot testing with real users, gathered feedback for system improvements, and contributed to a solution later continued as a university senior project.

Teaching Assistant (Python Programming), *Thammasat School of Engineering*

July 2025

- Assisted the instructor during laboratory sessions by explaining **Python programming** concepts, answering technical questions, and providing one-on-one guidance for coding exercises and debugging.
- Evaluated programming assignments and in-class quizzes, provided constructive feedback, and supported examination supervision to maintain a fair and organized learning environment.
- Supported students in developing problem-solving skills and programming fundamentals while strengthening communication, mentoring, and debugging abilities.

Programmer Intern (Full Stack Developer), *Somsri Garment Co., Ltd.*

June 2024 – July 2024

- Developed and enhanced internal full-stack web applications using **Vue.js, Nuxt.js, Node.js, Prisma, and Tailwind CSS** by implementing new features, resolving bugs, and improving existing workflows.
- Implemented business features including **PDF generation (pdfMake)**, **QR code generation**, **LINE Official Account integration**, and database-driven interfaces while testing APIs with **Postman** and managing source code with **GitHub**.
- Collaborated with senior developers to test, debug, and deliver production-ready features, gaining hands-on experience with modern software development practices, version control, and Agile team collaboration.

PROJECTS

Real-Time Project Request and Progress Management System

August 2025 – April 2026

Technologies: Django, Python, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, LINE Messaging API

- Expanded an internship prototype into a production-oriented request and workflow management system for residential communities.
- Designed and implemented a ticketing platform with RBAC, SLA monitoring, multi-level approvals, dashboards, reporting, duplicate request detection, and automated notifications.
- Refined the system using pilot-user feedback to improve workflow efficiency, usability, and scalability for real-world deployment.

TECHNICAL SKILLS

- Languages: Python, JavaScript, TypeScript, SQL, Java
- Frameworks: Django, Vue.js, Nuxt.js, Bootstrap, Tailwind CSS
- Database: PostgreSQL
- Tools: GitHub, Postman, Docker, Figma, VS Code, Basic microsoft office, Canva, CapCut
